

Amendments to the Drawings

The attached sheet of drawings includes changes to Figs. 1a and 1b. This sheet, which includes Figs. 1a and 1b replaces the original sheet including Figs. 1a and 1b.

In Fig. 1a, previously omitted element 2 has been added.

In Fig. 1b, previously omitted elements 2a, 11, 12 and 7 have been added. Element 3 has been corrected to show element 2.

Attachment: Replacement Sheet
 Annotated Drawing Sheet Showing Changes

REMARKS

The Official Action of December 1, 2006, and the prior art cited and relied upon therein have been carefully studied. The claims in the application are now claims 44-53, and these claims define patentable subject matter warranting their allowance. Favorable reconsideration and such allowance are respectfully urged.

Claims 21-43 have been cancelled and new claims 44-53 added. Claims 44-53 remain in the application for consideration.

With regard to the Examiner's comments regarding affirmation of the Applicant's provisional election, Applicant respectfully submits that new claims 44-53 are directed to the elected invention.

In response to the Examiner's objection to the drawings, specification and claims and rejection of claims 37-40 under 35 U.S.C. §112, first paragraph, and claims 21, 33, 35, 36 and 38-41 under 35 U.S.C. §112, second paragraph, Applicant has:

- (1) Amended Figs. 1a and 1b to identify element "2" and elements 2a, 7, 11 and 12 which comprise "the alternate embodiment" identified by the Examiner in paragraph 15 of his Office Action.

The specification has also been amended to insert numbers 2a, 7, 11 and 12 corresponding to their description in the specification;

- (2) amended the specification to provide appropriate section headings similar to those suggested by the Examiner;
- (3) amended the abstract to eliminate the term "means", and
- (4) cancelled claims 21-43 in favor of new claims 44-53.

Applicant respectfully submits that the Examiner's objection to the drawings, specification, abstract and claims and rejection of the above-identified claims under 35 U.S.C. §112, first and second paragraph has now been overcome.

With regard to the Examiner's remarks in paragraph 6 of the Office Action requiring a new oath or declaration or ADS, and paragraph 7 requiring a listing of the references cited in the specification, Applicant has attached the following documents:

- A print-out from PAIR of the Combined Declaration and ADS showing that the priority information has been correctly stated and received in the USPTO on 07 FEB 2005, and

-- A print-out from PAIR of two Information Disclosure Statements filed in the USPTO on February 7, 2005, and June 10, 2005, disclosing the references cited in the specification.

The Examiner has further rejected claims 21-23, 28-38 and 42 as being unpatentable over Gerster '425 in view of van Walraven EP'900. Applicant respectfully traverses this rejection as applied to new independent claims 44 and 53.

Independent claim 44 relates to a method for production of a vibration isolating pipe clip. The pipe clip which is to be produced has the same feature as we recited in claims 21 (presently cancelled).

With regard to the production of the vibration isolating member of the pipe clip, it is specified in claim 44 that it is made by forming and vulcanizing a rubber, wherein the vulcanized rubber is made porous by cleaving off water from hydrated salt at the vulcanization temperature whereby closed cavities with separating walls between them are formatted in the rubber. This method step is based on paragraphs [0055] and [0057] of the application's October 20, 2005 publication as well as on cancelled claims 33 and 35.

With regard to the cited prior art to Gerster and van Walraven, it is noted that neither of these documents

disclose or suggest producing a vibration isolating pipe clip by a method according to claim 44.

Accordingly, Applicant respectfully submits that proposed independent method claim is thus novel and non-obvious in view of the cited prior art.

New claim 45 is based on claim 34;

New claim 46 is based on paragraph [0055], first sentence of the application's publication;

New claim 47 is based on paragraph [0055] of the publication;

New claim 48 is based on paragraph [0039] of the publication;

New claims 49-52 are based on claims 36-40.

New independent claim 53 is a combination of the features of cancelled claims 21 and 24-26. Applicant notes that the Examiner had not acted on claims 24-26. Applicant respectfully submits that the features of claims 24-26 now included in new independent claim 53 set out structural features not taught by the cited prior art combination. Accordingly, Applicant submits that new claim 53 patentably defines over the cited prior art based on structural differences now set out in claim 53.

Appln. No. 10/523,926
Amendment dated February 27, 2007
Reply to Office Action of December 1, 2006

The prior art documents made of record and not relied upon have been noted along with the implication that such documents are deemed by the PTO to be insufficiently pertinent to warrant their applications against any of applicant's claims.

Favorable reconsideration and allowance are earnestly solicited.

Respectfully submitted,

BROWDY AND NEIMARK, P.L.L.C.
Attorneys for Applicant(s)

A cross-sectional view of a circular device. The device features a central cavity (6) surrounded by a thick, multi-layered wall. The wall consists of an outer layer (3) and an inner layer (10), with a middle section (4) containing a dotted pattern. A central vertical axis is indicated by a dashed line (2). A horizontal flange (5) is attached to the top of the device, and a horizontal pipe or tube (1) is connected to the side. The device is shown in a perspective view, with the layers and components labeled with numbers 1 through 10.
